Admission Process for Indian Institute of Management Sirmaur

Master of Business Administration (Tourism and Hospitality Management) 2023-25 Batch

This document details the process that will be adopted for selecting candidates for Admission to the Master of Business Administration Tourism and Hospitality Management (MBA-THM) at the Indian Institute of Management Sirmaur (IIMS) for the batch of 2023-25.

IIMS is part of the consortium of 9 participating IIMs that conducts Common Admission Process (CAP) and would consider Common Admission Test (CAT) as a evaluation criteria for admitting students in its MBA-THM 2023-25 programs. The admission process has been progressively refined over the years, based on past experiences, and the academic and industry performance of the candidates that were admitted to IIMS. The process arrived at is based on the relationship between the academic performance of students of the MBA-THM in IIMS and their past academic performance, performance in the admission interview, prior work experience, and diversity criteria. The selection criteria and weights given to various parameters are based on data from previous cycles as well as on inputs from relevant stakeholders. The selection criteria are usually reviewed every year and revised as necessary.

IIMS has found over the years that students who perform well academically in the MBA-THM are typically those who have a consistently good academic record during their secondary school, higher secondary school and graduation level, besides exhibiting sufficiently high managerial aptitude as measured by the CAT. Therefore, IIMS would use multiple parameters, namely academic performance in 10th & 12th grades, graduation programmes in relevant area as well as the candidate's section wise scores in CAT to judge the suitability of a candidate for the MBA-THM. Relevant work experience, if any, is also given weight in the selection. Evaluation by multiple criteria is also consistent with empirical research on recruitment and selection that shows greater efficacy of recruitment processes that use multiple criteria. The CAT score, over and above being a selection criterion, is also used to establish the minimum level of proficiency that is expected from the candidate in respective faculties as indicated by section-wise minimum scores in the CAT. The various criteria mentioned above are used to arrive at a composite score for every candidate, which in turn is used to select candidates for the subsequent stages. The remaining part of the document explains this process in detail.

IIMS would adopt a two-phase selection process and accordingly these selection criteria are applied in two phases. The first phase of the process is applied to all eligible candidates who meet the cut-off criteria as mentioned in Table 1 to determine candidates to be called for a personal interview (PI). The PI would be conducted through online mode for this admission cycle as agreed among CAP

members. The PI process will be common to IIMs which are participating in the Common Admission Process (CAP). The second phase consist of preparing the final selection/merit list on the basis of the composite score arrived at using weightages as per valid CAT-2022 score, PI score, academic profile, work experience and diversity (academic disciplines and other criteria), as mentioned in Table-2. The selection process, parameters and weights are used uniformly for all applicants within a specific category. Sufficient candidates are shortlisted at each stage from each social category to meet the reservation requirement for each group, as applicable at that time as per Government of India norms.

IIMS would not be taking any Written Ability Test (WAT) for the Admission Process of MBA-THM 2023-25 Batch as per the decision among the CAP participating IIMs. During the Interview, the panel will evaluate each candidate's academic background, quality of work experience and professional fit in terms of program requirements and industry-appropriate behavioral competence. The scores of the Interview and criterion as specified in this document (with appropriate weightages) will be used cumulatively in the second and final phase to select the candidates for the programme.

Phase 1: Shortlisting for Personal Interview (PI)

A shortlist would be prepared comprising candidates who have secured a pre-determined minimum cut-off score on all sections of CAT 2022 (except for Supernumerary seats for promoting diversity where specified) as outlined in Table 1 below.

Table 1: Criteria for shortlisting the candidates for PI process

Category	Cut-off Percentiles			
	Verbal & Reading Comprehension (VARC)	Data Interpretation & Logical Reasoning (DI LR)	Quantitative Aptitude (QA)	Total Percentile
General	65	65	65	85
EWS	50	50	50	55
NC-OBC	50	50	50	55
SC	30	30	30	40
ST	25	25	25	35
DAP	25	25	25	35

Note. These are the minimum prescribed cut-offs for preparing the short-list. The actual cut-off scores of those called for interviews could be higher. The criterion mentioned in above Table is subject to revision at any point of time depending upon the admission requirements of IIMS. The criteria w.r.t. individual sectional percentile and the overall percentile may be lowered/relaxed, if the actual number of shortlisted candidates are found to be less than the required number of candidates to be called for PI in one or more categories. The relaxation, if any, in the cut-off criteria shall be to ensure a sufficient number of candidates for each of the categories for PI process. The Admission Committee at IIM Sirmour reserve the right to have a higher/lower cut-off than those mentioned above.

Phase II: Preparation of Final Merit List

IIMS look forward to accept candidates who reflect high quantitative, sectoral specific managerial and people skills coupled with suitable corporate experiences. Moreover, IIMS also intends to create a diverse learning atmosphere supportive of creativity and inclusiveness. In pursuance of the same, the following criteria are designed to attract and groom students. In this phase, a final merit list will be prepared based on the following criteria listed in Table 2.
